OUR MISSION

Blending your designs with our experience, innovation and technology to create custom solutions.

JIT's personable staff utilizes 30 years of industry experience and expertise to create boundary-breaking solutions with innovative materials and cost-effective pricing. Short turnaround time on both quotes and project completion is standard company practice. JIT helps you meet performance demands, cost constraints, and aesthetic intent through concept development, engineering, project management, advanced manufactur-

ing, and on time delivery. JIT's Flow Dynamic Waterjet equipment is run by trained, experienced specialists ensuring your project optimal results. More accurate parts eliminates secondary finishing. And JIT's Flow Dynamic Waterjet cuts faster, which also expands your profit margin.
